

**Dr. Emmanuel Lacôte**  
(Université Claude Bernard Lyon 1, France)

**"Boron radicals and macroradicals"**

Dr. Lacôte studies radical chemistry, main group chemistry (B, N), and photopolymerizations. In this lecture, he is going to present how NHC-Boryl radicals can initiate photopolymerizations in bulk and dispersed media (emulsion and dispersion) using visible light photons to generate the initiating radicals.

16:30-18:00, June 1 (Thu), 2023@Room 142 (4th floor, #1 building, Sch. of Eng.)  
Host: Makoto Yamashita (Grad. Sch. of Eng.) (makoto@oec.chembio.nagoya-u.ac.jp)
